Software Requirements Specification

Personal Routine Tracker Web Application

Document Type	Software Requirements Specification (SRS)
Product Name	Personal Routine Tracker
Version	1.0 Final
Date	2026-10-20
Language Support	English only
Platform	Responsive web application, PWA-capable
Data Storage	Local browser storage in MVP
Access Model	No login required in MVP

1. Introduction

1.1 Purpose

This document defines the requirements for a Personal Routine Tracker web application. The application will help a user create a personal routine, track daily tasks, maintain streaks, receive reminders, and review progress.

1.2 Product Scope

The product is a simple, private, mobile-friendly web app for one personal user. It will allow the user to define routines such as morning routine, study routine, workout routine, work routine, and night routine. The user can add tasks, mark them as done or skipped, and view progress on a dashboard.

1.3 Intended Audience

- Client / product owner
- UI/UX designer
- Frontend developer
- Tester

1.4 Definitions

Term	Meaning
Routine	A set of tasks that the user wants to follow regularly.
Task	A single activity inside a routine, such as “Exercise” or “Study 1 hour”.
Streak	Continuous successful days based on a completion threshold.
MVP	Minimum Viable Product, the first working version.
PWA	Progressive Web App, a web app that can work offline and be installed.

2. Final Product Decisions

The following decisions are fixed for the MVP and are treated as required behavior.

Area	Final Decision
Login / Account	No login in MVP. The app is local-first and device-based.
Data Storage	Data is stored locally in the browser using localStorage or IndexedDB.
Language	English only.
Platform	Responsive web app, usable on mobile, tablet, and desktop.
Installability	The app should be PWA-capable and installable where supported.
Notifications	Browser notifications only in MVP. No email or WhatsApp in MVP.
Templates	Built-in routine templates are included.
Streak Rule	A day is successful if at least 70% of mandatory scheduled tasks are completed.
Optional Tasks	Optional tasks do not break the streak.
Dark Mode	Light mode and dark mode are included.
History / Calendar	A simple monthly calendar view is included.
Backup	JSON export and import are included.
Out of Scope for MVP	Cloud login, multi-device sync, payment, social features, native mobile app, AI coaching.

3. Functional Requirements

3.1 Onboarding and Local Profile

ID	Requirement	Priority
FR-001	The system shall allow the user to start using the app without login.	High
FR-002	The system shall show a welcome screen for first-time users.	High
FR-003	The system shall ask for the user’s name during setup.	High
FR-004	The system shall ask for wake-up time and sleep time.	High
FR-005	The system shall allow the user to select interest categories such as Health, Fitness, Study, Work, and Personal.	Medium
FR-006	The system shall offer built-in routine templates during onboarding.	Medium
FR-007	The system shall allow the user to skip templates and create routines manually.	High
FR-008	The system shall save onboarding data locally.	High

3.2 Routine Management

ID	Requirement	Priority
FR-009	The system shall allow the user to create a routine with a name and category.	High

FR-010	The system shall allow the user to assign a routine to specific days of the week.	High
FR-011	The system shall allow the user to mark a routine as active or inactive.	High
FR-012	The system shall allow the user to edit a routine.	High
FR-013	The system shall allow the user to delete a routine with confirmation.	High
FR-014	The system shall allow the user to duplicate an existing routine.	Medium
FR-015	The system shall allow the user to apply a built-in template and modify it.	Medium

3.3 Task Management

ID	Requirement	Priority
FR-016	The system shall allow the user to add tasks inside a routine.	High
FR-017	Each task shall have a title. Title is required.	High
FR-018	Each task may have a scheduled time, duration, priority, notes, and optional flag.	High
FR-019	The system shall support fixed-time tasks and all-day tasks.	Medium
FR-020	The system shall allow task priority values: Low, Medium, and High.	Medium
FR-021	The system shall allow the user to mark a task as optional.	High
FR-022	The system shall allow the user to reorder tasks inside a routine.	Medium
FR-023	The system shall allow the user to edit and delete tasks.	High

3.4 Today Tracker

ID	Requirement	Priority
FR-024	The system shall show all tasks scheduled for the current day on the home screen.	High
FR-025	The system shall sort timed tasks by scheduled time.	High
FR-026	The system shall show today’s completion progress as a count and percentage.	High
FR-027	The system shall allow the user to mark a task as Done.	High
FR-028	The system shall allow the user to mark a task as Skipped.	High
FR-029	The system shall automatically mark a timed task as Missed after its grace period.	Medium
FR-030	The system shall show the next upcoming task.	Medium
FR-031	The system shall allow the user to add a one-time task for today.	Medium
FR-032	The system shall allow the user to undo Done or Skipped status on the same day.	Medium

3.5 Completion, Streak, and Score

ID	Requirement	Priority
FR-033	The system shall store completion logs for each task occurrence.	High
FR-034	The supported task statuses shall be Pending, Done, Skipped, and Missed.	High
FR-035	The system shall calculate daily completion percentage using mandatory scheduled tasks only.	High

FR-036	The system shall increase the streak when daily completion is at least 70%.	High
FR-037	The system shall not break the streak due to skipped optional tasks.	High
FR-038	The system shall show current streak and best streak.	High
FR-039	The system shall treat a day with zero mandatory tasks as neutral and shall not break the streak.	Medium

3.6 Reminders and Notifications

ID	Requirement	Priority
FR-040	The system shall allow the user to enable or disable browser notifications.	High
FR-041	The system shall allow reminder offsets of 5, 10, 15, and 30 minutes before task time.	High
FR-042	The system shall suppress notifications during the user's sleep time as quiet hours.	Medium
FR-043	If notification permission is denied, the system shall show an in-app message guiding the user.	Medium
FR-044	The system shall show in-app reminders even when browser notifications are unavailable.	Medium

3.7 Dashboard and Reports

ID	Requirement	Priority
FR-045	The system shall show a dashboard with today's progress, current streak, next task, and recent activity.	High
FR-046	The system shall show a 7-day completion chart.	Medium
FR-047	The system shall show category-wise performance.	Medium
FR-048	The system shall show the most skipped or missed tasks.	Medium
FR-049	The system shall show a simple weekly summary.	Medium

3.8 History and Calendar

ID	Requirement	Priority
FR-050	The system shall provide a monthly calendar view.	Medium
FR-051	The calendar shall color-code days as successful, partial, missed, or no-task days.	Medium
FR-052	The user shall be able to click a past date and view that day's task details.	Medium
FR-053	The system shall retain historical completion data locally.	High

3.9 Settings and Data Management

ID	Requirement	Priority
FR-054	The system shall allow the user to update profile name, wake time, and sleep time.	High
FR-055	The system shall support light mode, dark mode, and system theme.	Medium
FR-056	The system shall allow the user to manage notification preferences.	High

FR-057	The system shall allow the user to export all data as a JSON file.	High
FR-058	The system shall allow the user to import a JSON backup file with confirmation.	High
FR-059	The system shall allow the user to reset all data with confirmation.	High
FR-060	The system shall show app version and basic about information.	Low

4. Business Rules

ID	Rule
BR-001	All user data is stored locally on the device in MVP. No cloud account is required.
BR-002	All times are based on the user's device time zone.
BR-003	A timed task becomes Missed if it is not marked Done or Skipped within 30 minutes after its scheduled end time.
BR-004	Optional tasks are excluded from streak-breaking logic.
BR-005	A day is counted as successful if at least 70% of mandatory scheduled tasks are marked Done.
BR-006	A day with zero mandatory tasks is neutral and does not break the streak.
BR-007	Deleting a routine requires confirmation. Past completion history may be retained for reporting.
BR-008	The same task title may exist in different routines.
BR-009	The MVP supports only one local user profile.

5. Non-Functional Requirements

ID	Requirement
NFR-001	The app shall load the first screen within 3 seconds on a normal connection.
NFR-002	Task completion actions shall update the interface within 1 second.
NFR-003	The app shall be responsive for screen widths from 320px to 1920px.
NFR-004	The app shall work offline after the first successful load.
NFR-005	Local data shall persist after browser restart.
NFR-006	The user interface shall be English only.
NFR-007	The app shall use accessible color contrast and clear labels.
NFR-008	The app shall not share personal routine data with third parties.
NFR-009	The app shall be installable as a PWA where the browser supports it.
NFR-010	The codebase shall be modular and easy to extend for future cloud features.

6. Data Model

6.1 Profile

Field	Type	Required
name	String	Yes
wake_time	Time	Yes
sleep_time	Time	Yes
categories	Array	No
created_at	DateTime	Yes

6.2 Routine

Field	Type	Required
id	ID	Yes
name	String	Yes
category	String	No
days	Array	Yes
is_active	Boolean	Yes
created_at	DateTime	Yes
updated_at	DateTime	Yes

6.3 Task

Field	Type	Required
id	ID	Yes
routine_id	ID	Yes
title	String	Yes
description	String	No
scheduled_time	Time	No
duration_minutes	Integer	No
priority	Enum	No
is_optional	Boolean	Yes
reminder_offset	Integer	No

6.4 Completion Log

Field	Type	Required
id	ID	Yes

task_id	ID	Yes
date	Date	Yes
status	Enum	Yes
completed_at	DateTime	No

6.5 Settings

Field	Type	Required
theme	String	Yes
notifications_enabled	Boolean	Yes
quiet_hours_enabled	Boolean	Yes
default_reminder_offset	Integer	No

6.6 Streak

Field	Type	Required
current_streak	Integer	Yes
best_streak	Integer	Yes
last_success_date	Date	No

7. Required Screens

Screen	Purpose
Welcome / Onboarding	Introduce the app and collect basic user preferences.
Dashboard / Today	Show today’s tasks, progress, streak, and next task.
Routines	List all routines and allow create, edit, delete, duplicate, and activate.
Create / Edit Routine	Define routine details and add tasks.
Calendar / History	Show past performance in a monthly view.
Reports	Show charts, category performance, and weekly summary.
Settings	Manage profile, theme, notifications, backup, import, export, and reset.

8. MVP Acceptance Criteria

The MVP is accepted if all the following are working:

1. The user can open the app on mobile and desktop without login.
2. The user can complete onboarding.
3. The user can create at least one routine.
4. The user can add tasks to that routine.
5. The user can see today’s tasks on the dashboard.
6. The user can mark tasks as Done or Skipped.

7. The daily progress percentage updates correctly.
8. The streak increases correctly when completion is at least 70%.
9. Optional tasks do not break the streak.
10. The user can enable browser notifications.
11. The user can view a simple monthly calendar.
12. The user can export data as JSON.
13. The user can import a JSON backup.
14. The app works in dark mode.
15. The app interface is English only.
16. The app does not lose local data after refresh.

9. Future Enhancements

The following features are not part of MVP but may be added later:

- Cloud account and login
- Multi-device synchronization
- Email reminders
- WhatsApp or Telegram reminders
- AI-based routine suggestions
- Google Calendar import
- Pomodoro timer
- Mood tracking
- Advanced analytics
- Native mobile app

> **End of Document.**
> This SRS is finalized for MVP development of the Personal Routine Tracker web application.
